Major topics include definition of cosmetics, make-up cosmetics, skin-care cosmetics, hair-care cosmetics, vehicles of cosmetic products, surfactants, colorants, alpha hydroxyl acids & beta hydroxyl acids, antioxidants and sunscreens, skin-whitening agents, hydrating substances / moisturizers, antiperspirants & deodorants and botanical ingredients.

**5. Intended Learning Outcomes (ILOs):**

This is an introductory chemistry course designed for students either with or without background knowledge in chemistry. Students are expected to achieve the following outcomes after taking the course:

- (i) To identify the contributions of chemists to the technological innovations of modern personal care products.
- (ii) To develop basic understanding of fundamental chemistry concepts and the scientific basis for cosmetic formulations.
- (iii) To employ concepts in chemistry to explain some cosmetic technology and cosmetic inventions.
- (iv) To appreciate the efforts of chemists in cosmetic product design and developments.

**6. Assessment scheme:**
